2015 by Month	Number of Cases
January 2015	29
February 2015	36
March 2015	41
April 2015	55
May 2015	71
June 2015	37
July 2015	49
August 2015	60
September 2015	43
October 2015	33
November 2015	41
December 2015	27
Total	522

2014 by Month	Number of Cases
January 2014	46
February 2014	57
March 2014	72
April 2014	61
May 2014	45
June 2014	37
July 2014	48
August 2014	54
September 2014	37
October 2014	51
November 2014	40
December 2014	39
Total	587

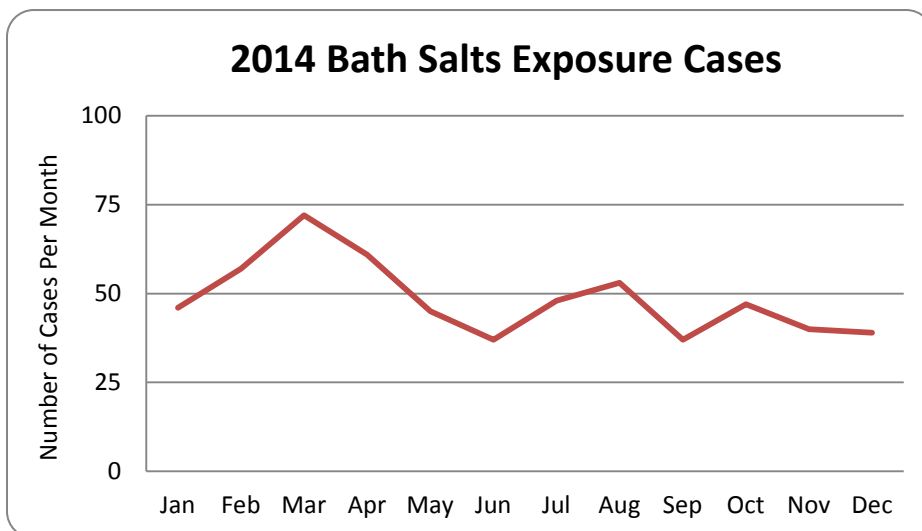

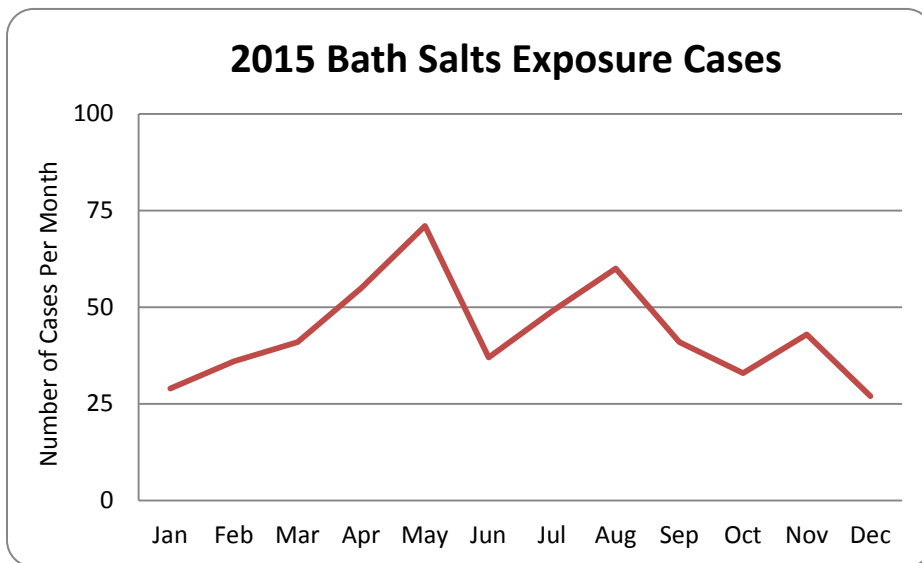

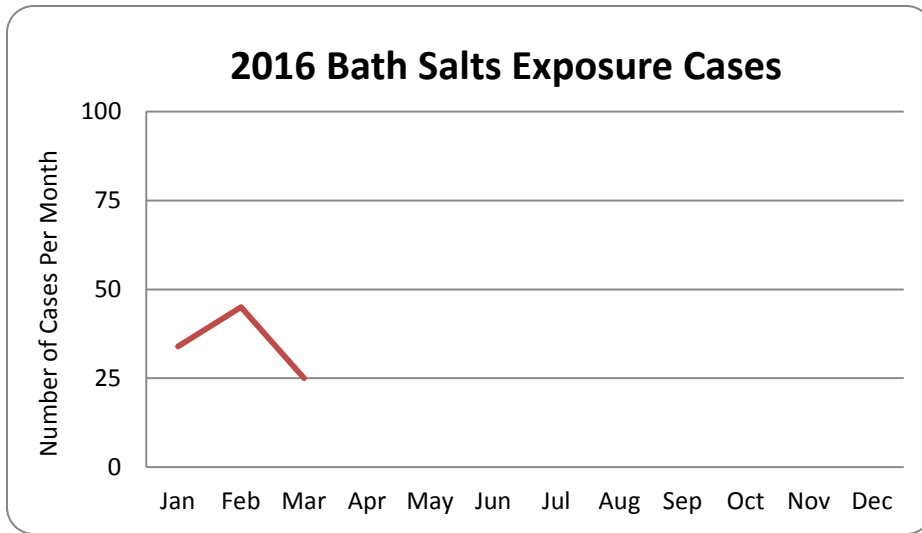

2013 by Month	Number of Cases
January 2013	96
February 2013	86
March 2013	78
April 2013	102
May 2013	97
June 2013	80
July 2013	84
August 2013	83
September 2013	75
October 2013	63
November 2013	75
December 2013	79
Total	998

2012 by Month	Number of Cases
January 2012	234
February 2012	232
March 2012	267
April 2012	289
May 2012	294
June 2012	425
July 2012	374
August 2012	181
September 2012	123
October 2012	105
November 2012	89
December 2012	84
Total	2,697

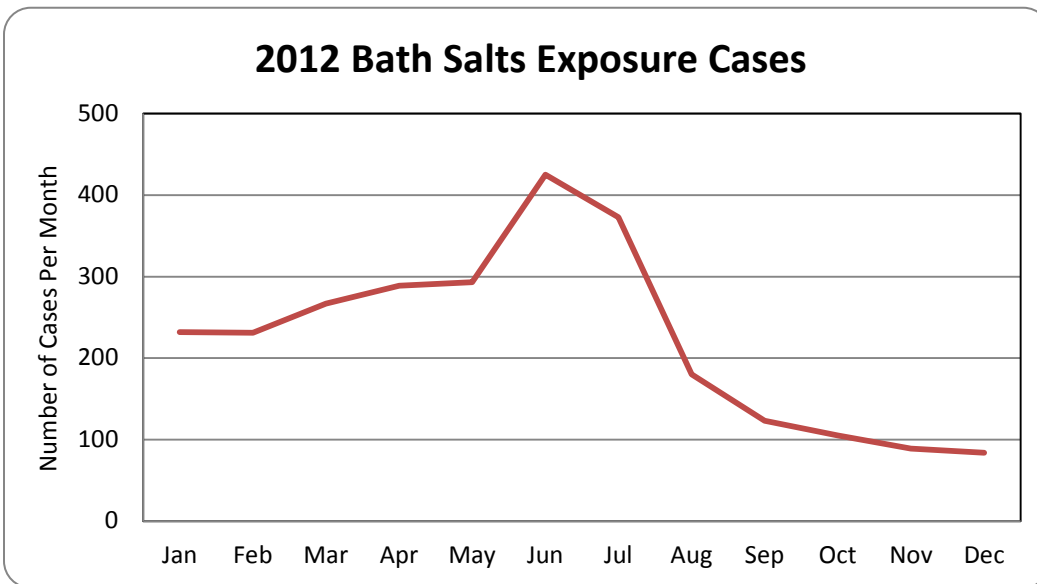

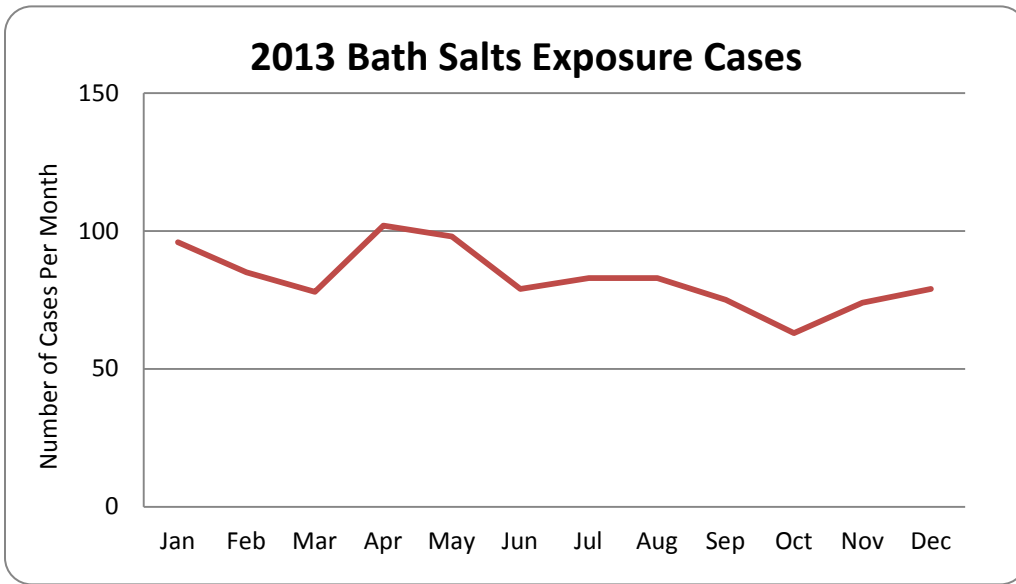

Please note: American Association of Poison Control Center data for this year and last is considered preliminary because it is possible that a poison center may update a case anytime during the year if new information is obtained. In the fall of each year, the data for the previous year is locked, and no additional changes are made.

The term “exposure” means someone has had contact with the substance in some way; for example, ingested, inhaled, absorbed by the skin or eyes, etc. Not all exposures are poisonings or overdoses.
