

American Association of Poison Control Centers

Synthetic Cannabinoid Data
July 31, 2016

These numbers reflect the closed human exposures to synthetic cannabinoid (THC homologs) reported to poison centers as of July 31, 2016. The numbers may change as cases are closed and additional information is received.

Year	Number of Cases
2011	6,968
2012	5,230
2013	2,668
2014	3,682
2015	7,779
2016, Through July 31	1,682

2016 by Month	Number of Cases
January 2016	289
February 2016	282
March 2016	302
April 2016	207
May 2016	226
June 2016	167
July 2016	209
August 2016	
September 2016	
October 2016	
November 2016	
December 2016	
Total	1,682

2015 by Month	Number of Cases
January 2015	358
February 2015	273
March 2015	270
April 2015	1,512
May 2015	1,205
June 2015	656
July 2015	741
August 2015	720
September 2015	629
October 2015	613
November 2015	453
December 2015	364
Total	7,794

2014 by Month	Number of Cases
January 2014	181
February 2014	167
March 2014	205
April 2014	250
May 2014	312
June 2014	337
July 2014	280
August 2014	442
September 2014	395
October 2014	439
November 2014	357
December 2014	315
Total	3,682

2013 by Month	Number of Cases
January 2013	177
February 2013	252
March 2013	253
April 2013	267
May 2013	277
June 2013	230
July 2013	186
August 2013	204
September 2013	213
October 2013	200
November 2013	209
December 2013	200
Total	2,668

2012 by Month	Number of Cases
January 2012	657
February 2012	634
March 2012	644
April 2012	498
May 2012	507
June 2012	497
July 2012	459
August 2012	346
September 2012	315
October 2012	252
November 2012	202
December 2012	219
Total	5,230

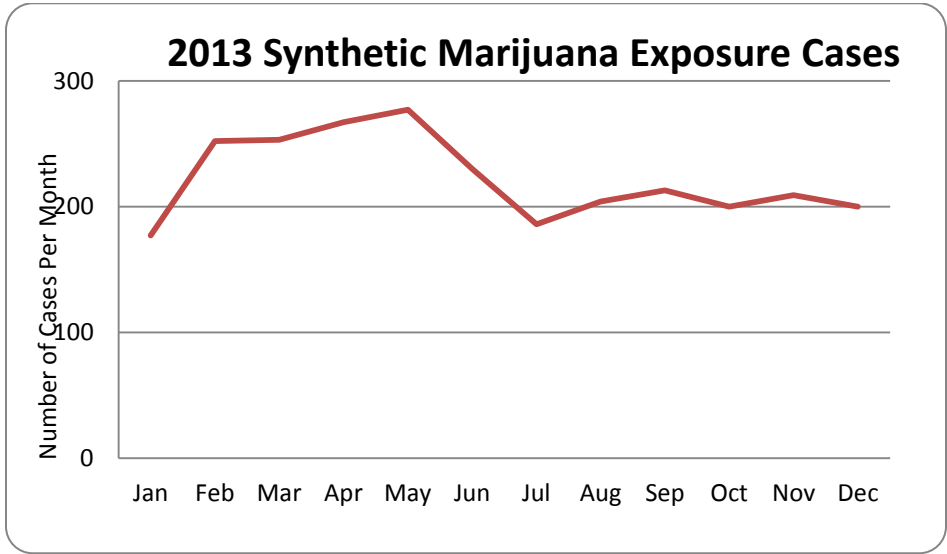

Please note: American Association of Poison Control Center data for this year and last is considered preliminary because it is possible that a poison center may update a case anytime during the year if new information is obtained. In the fall of each year, the data for the previous year is locked, and no additional changes are made.

The term “exposure” means someone has had contact with the substance in some way; for example, ingested, inhaled, absorbed by the skin or eyes, etc. Not all exposures are poisonings or overdoses.
